

## **Martins full automatic drying system : up to 900 kg /hour**

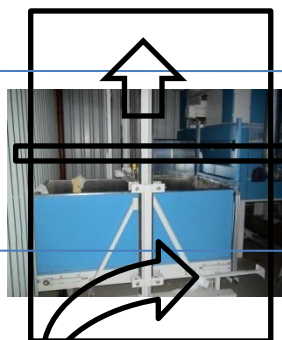

2 x steam heated dryers WT 18/150 HGU  
1 Laundry trolley lifter                      1 shuttle  
1 central control panel

Capacity: 150kg  
1 unloading conveyer  
**Year: 2001**

The unloading conveyer receives the dried load of the dryers and unloads into a laundry trolley

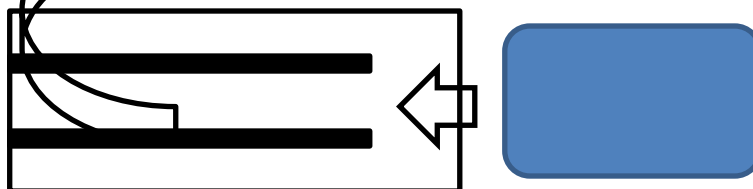

The whole system is controlled by a central controlpanel.

The dryers will finish the drying process after 20 minutes. They will unload automatically

The shuttle drives automatically to one of the 2 dryers. It will unload automatically into the dryer.

Automatic loading system:

The laundry trolley goes into the loader. The loader lifts the trolley and flips it over so the linen falls into the shuttle
